

The Program

The Medical Lab Assistant Program at the Arizona Medical Training Institute is designed to prepare students for entry-level positions in clinical settings, such as Hospital Laboratories, Research Laboratories, and Physician Office Laboratories. The Program design is for the practicing Phlebotomist or for one that has recently completed an approved Phlebotomy Training Program, including AMTI's Phlebotomy Technician Program.

The Medical Lab Assistant curriculum prepares individuals to perform clinical laboratory procedures that are used in the maintenance of health and diagnosis/treatment of disease. You will study chemistry, hematology, serology, microbiology, parasitology, immunology, transfusion medicine and more.

Our Medical Lab Assistant program is approved by the American Medical Technologists.

Not a phlebotomist, but still want to become an MLA?

Specimen collection is an essential skill for any Medical Laboratory Assistant. AMTI offers an MLA with phlebotomy option to satisfy the phlebotomy prerequisite needed to transition to the MLA program. This two-weekend option is geared to provide the basic training to safely perform a variety of collections required in a healthcare setting. Call us to find out if this option is right for you.

“My experience with AMTI was excellent. It wasn't just a school for me, it was my second home and a gateway to my new career.”

Why Blended eLearning?

Blended eLearning programs are a mix of both online and classroom instruction, allowing students the flexibility to take and complete affordable courses according to their own schedules.

We know that providing the most up-to-date technical resources through the eLearning format provides our students a competitive advantage in the classroom and in the real world.

Register today!

www.azmti.com 480-835-7679

186 hour course

90 hours of eLearning

96 hours - 6 weekends of classroom and lab instruction.

Externship

120 hours at CLIA Approved Lab

Certification as a CMLA

Eligible to take the AMT National Certification Exam

Program Director

Christine Gunning, MT (ASCP), MS

Christy has worked as both a Medical Laboratory Assistant, and a Clinical Laboratory Scientist/Medical Technologist at the Mayo Clinic.

Today, she is the Laboratory Services Supervisor at St. Joseph's Hospital & Medical Center.

Her experience in the field puts her in a unique position to both know and teach the essential skills that will help you become an excellent Medical Lab Assistant.

AMTI prides itself in bringing "real life" into the classroom.
